

Autism Spectrum Disorder Evaluation and Diagnosis

We understand the challenges families face when their children are experiencing delays in meeting milestones and other developmental concerns. We also know that early intervention is often key to overcoming these challenges. Our developmental experts can rapidly diagnose to reduce the wait time for important early interventions. A child does not need to be a Clinic patient for Autism Assessment and Diagnosis.

How the
evaluation
process works

Parents
complete
paperwork and
questionnaires

Practitioner
will observe
the child

Parent receives
evaluation letter
and summary
interview

Family receives
a packet of
resources and
information

The Clinic for Special Children was founded by Karen Harum, MD to provide accurate diagnoses, whole child treatments, specialty care, and consultation for children with various neurodevelopmental disorders. The team at the Clinic aims to offer timely evaluations and diagnoses to help improve a child's quality of life and assist families with finding community support as quickly as possible.
